

ULTRAFINE-GRINDING »TURKISH«

ULTRAFINE-GRINDING

*Consistency / 50 – 125 μm particle size / High capacity / Superior coffee quality /
Ultra cooled grinding process / All rolls and homogenizer water cooled*

Technical Features:

- **Independent grinding roll drives, allowing for:**
 - Optimum roll speed
 - High speed ratio range
- **Design**
 - Heavy-duty bolted construction
 - Tolerances much lower than welded construction
- **Control**
 - Touch screen operation
 - Recipe driven
- **Temp control**
 - Ultra cooled grinding process
 - Cutting edge temperature control system
 - This preserves the aroma, colour, roast degree, volatiles
- **Gap control**
 - High precision gap control
 - Below +/- 10 micron
 - Roll reset after grinding stop (autom.)
- **Roll surface**
 - Special surface treatment guarantees more hardness than other rolls on the market
- **Scraper**
 - Special new developed dynamic scraper system (DSS)
